

Optic Fiber Cleaning Kits

The complete solution for fiber end-face cleaning

Dirt, dust and other contaminations are the enemy of high-speed communications over optical fiber link. Maximally using fiber resource requires all optical connections are clean and free of contaminants.

FibreOptica's FFC-100, the reel-type optic fiber end-face cleaner with one open window designed in the way of handy operation for all kinds of connectors (SC, SC2, FC, ST, E2000, DIN, D4, MU, LC, MT and etc), can fast and completely remove dust, dirt and other contaminations.

FibreOptica also offers a complete solution for fiber end-face cleaning – Optic Fiber Cleaning Kits (**FFC-KITs**). Using the Optic Fiber Cleaning Kits ensures all fiber end-faces are clean before every optical connection. The Optic Fiber Cleaning Kits have the best tools to effectively remove the contaminants with ease. All cleaning materials are lint-free and enable an optimal wet and dry cleaning process. The handy fiber microscope with 200 times image zoom is a very convenient tool to view the end-face and confirm the cleaning result. It can also view the APC type of end-faces with an APC adapter.

The rugged carrying case is ideal for carrying and storing the cleaning components safely. The design also reserves space for the compressed air can (note: the compressed air is not included in the package). User can purchase compressed air locally and put inside the carrying case if needed.

Key Features

- Contains everything needed to eliminate contamination that causes trouble for fiber connection.
- FFC-100, a Fabric Dry-cleaning without volatile residues and harmful substances. It is a packet-sized cleaner and the cover slide opens leaving the clean weave ready to clean the connector.
- Various sticks are designed to fit many styles of connector ports.
- Also its anti-static materials can keep dust and particles away from your connector.
- The handy fiber microscope with 200 times image zoom and an adapter for viewing the APC type of end-faces.
- A used fabric cartridge can be easily deposited and replaced with a new one.
- Rugged carrying case stores and transports all cleaning tools safely.

Order Information
